PROFESSIONAL SUMMARY

QA Engineer and Full-Stack Developer with 2 years of experience in test planning, automated testing, and quality assurance for web and real-time systems. Authored 100+ Cypress E2E and manual test cases, helping achieve zero critical bugs at production launch. Skilled in React, TypeScript, Node.js, PostgreSQL, CI/CD integration, API testing, and end-to-end quality ownership across the SDLC.

TECHNICAL SKILLS

Testing & QA: Cypress (E2E), Vitest, Playwright, Manual Testing, Test Case Authoring, Defect Triage
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP
Frameworks & Libraries: React, Node.js, Angular, Vite, TanStack Start, TanStack Query, Tailwind CSS
Databases & Backend: PostgreSQL, MySQL, MongoDB, Supabase, Appwrite, Vanilla PHP, RESTful APIs, WebSockets
DevOps & Tools: Docker, Git, GitHub, Vercel, Netlify, Postman, Figma
Concepts: Full-Stack Development, Agile/SDLC, SEO Optimization, CI/CD, Real-Time Systems, PWA, OOP

EXPERIENCE

Volunteer Software Development Engineer in Test (SDET) June 2025 - Present

I Care Center | *Olongapo City, Philippines*

- Authored 15+ Cypress E2E and manual test cases for the church website; established a full regression suite prior to production deployment, achieving zero critical bugs at launch.
- Designed and executed 20 test plans and Playwright tests covering UI, API, and WebSocket integration for the OBS-ProPresenter Remote Control system; diagnosed and resolved 5 post-launch defects within 24 hours of first live service.
- Diagnosed and resolved 15+ production bugs across web and livestream systems; documented defect patterns to prevent recurrence.
- Rebuilt and migrated the church website from legacy Weebly to a custom full-stack system (23 pages, 7 ministries) with end-to-end SDLC ownership — Figma through deployment — achieving second-position Google ranking via manual SEO and GSC submission.
- Designed and shipped a real-time OBS-ProPresenter Remote control system via WebSockets, deployed March 2026.
- Implemented an intelligent agent capable of detecting frozen and blackened cameras, resulting in 20% lesser misclicks in livestream feeds.
- Collaborated cross-functionally with a 7–13 member team to translate operational requirements into shipped, tested features.

Volunteer Production Staff Jan 2024 - Present

I Care Center | *Olongapo City, Philippines*

- Operated live production across 100+ services, synchronizing lyrics, visuals, and media in real time via OBS and ProPresenter.
- Caught and corrected 30+ pre-broadcast errors including lyrical and visual typos, ensuring broadcast-ready delivery every week.
- Configured and maintained OBS-ProPresenter integration via OBS-NDI and NDI Local Servers, establishing the church's current livestream infrastructure.

Data Encoding Internship July 2025 - Aug 2025

ACEMC-Baypointe Hospital | *Subic Bay Freeport Zone, Philippines*

- Verified and cross-checked 20,000+ patient records to identify redundancies and correct data errors.
- Accurately encoded 10,000+ charge slip amounts and processed required financial computations.

Part-time Data Encoder/Bookkeeper May 2023 - Present

TDA Car Rental | *Olongapo City, Philippines*

- Prepared more than 150 client billings and recorded receipts, billing statements, and customer rates for financial monitoring.
- Processed 13 percentage and income tax returns via the BIR eBIRForms system.
- Performed basic bookkeeping and responded to 100+ customer inquiries via email.

EDUCATION

Gordon College | Olongapo City, Zambales, Philippines (Current GPA: 94.43/1.3) ~July 2027

B.S. in Computer Science

Relevant Courses: Intelligent Systems, Software Engineering 1 & 2, Project Management, Data Structures and Algorithms

PROJECTS

SnapBooth | React, TanStack Start, Node.js, WebSockets

- Developed a real-time photo booth application with synchronized image capture for paired users.
- Implemented secure code-based room management to isolate user sessions.
- Engineered hybrid WebSocket and REST API synchronization for low-latency real-time communication.

Botcha Buster (Thesis Project) | React, Tanstack Query, Node.js, Supabase, PostgreSQL, OpenCV

- Built a Progressive Web App (PWA) for DTI and City Veterinary Office meat inspectors to detect spoilage and double-dead meat
- Implemented image processing techniques for classification
- Designed offline-capable system for use in wet market environments

ExamHub - Exam System (FE/BE Final Project) | React, Tanstack Start, Tailwind CSS, MySQL, Vanilla PHP,

- Developed a full-stack system with AES-256-GCM encryption on sensitive examination data
- Integrated a full scale anti-cheat system prohibiting multi-monitor set-ups, right clicks, tab-outs, and more.
- Improved accessibility and usability for students on mobile devices
